

TIBCO BusinessConnect Remote

In order for large enterprises deploying B2B solutions to get the full value of their investment, they must be able to support interactions with trading partners of all sizes. However, many small and mid-sized companies do not have the resources to deploy their own robust B2B solutions, so enterprises must deal with the inefficiency and expense of doing business with these companies using manual processes conducted via phone, fax and mail.

TIBCO BusinessConnect™ Remote software is a low-cost gateway that can easily be deployed to small and mid-sized partners and customers so they can participate in business processes using leading B2B protocols. By letting small businesses interact with their systems through BusinessConnect Remote, organizations can rapidly and dramatically increase the size of their trading partner community.

TIBCO supports interactions with organizations of all sizes, with standards-based products geared to the requirements of each partner type.

AT A GLANCE

TIBCO BusinessConnect Remote software is a light-weight client for TIBCO BusinessConnect. It allows the secure exchange of transactions with small and medium-size trading partners using AS2. The only requirement for the trading partner is a computer with an internet connection.

BENEFITS

- Facilitates the rapid expansion of a company's partner community.
- Reduces administrative concerns by simplifying connection configuration.
- Reduces security configuration errors through the automatic exchange of trading partner profile information.
- Enables secure document exchange using AS2. Documents can be signed, encrypted and compressed.

ATTRIBUTES & CAPABILITIES

Connection Configuration

A deployment wizard simplifies security certificate and connection configuration. Trading partner profile information is automatically exchanged with the TIBCO BusinessConnect host. Updates on the host are picked up automatically.

Monitoring and Management

The TIBCO BusinessConnect Remote console provides the following features:

- Monitor receipt of documents
- Drag and drop files to send
- Option to auto-poll directory for files to move
- Ability to monitor document exchange progress in real-time
- Document history

Document Exchange

TIBCO BusinessConnect provides flexibility by supporting exchange of different types of documents. Here are some of the types:

- Text
- XML
- Binary
- EDI X12
- EDI Edifact
- EDI Tradacoms

PLATFORMS

- Microsoft Windows 2003 Server
- Microsoft Windows XP
- Microsoft Windows 2000 Server
- Linux Kernel 2.4.6 or later
